A3 – Report

Features Implemented:

- Gradient colour Navigation bar
- Tablet/Mobile view with all pages
- Icons replacing text-buttons
- Input for forms that interact with the database
- Student and Instructor views
- Views that only parse their class section
- Animated pop-up window
- Confirmation of submission
- Page authentication
- Login page
- Signup page
- Feedback, remark “closed” status (deletion)

Features unable to complete:

- Dropdown menu with a centered navigation bar (only works with float: left/right)
- Dynamically shrinking calendar object

Items worked by Johnson Lai:

- Instructor User pages (instructor panel, iviewgrades, iviewfeedback, iviewremarks)
 - o View Grades, Feedback, Remarks
 - Gradient background, panel transition
 - Edit marks
 - Trash icon to delete requests
 - Input verification with JS
- Tablet/Mobile views (mobile.css, js)
- Nav-bar CSS design (gradient, highlight current page, animation)
- Some database data
- Logout, sessional Build () function
- Page authentication

Items worked by Yuxin Chen:

- Footer
- Some database data
- Student user pages
 - o View grade & Remark request

- Confirmation of submission
- Animation
- Flexible heading
- Anonymous feedback
 - Option to select an instructor

Items worked by Seyon Kuganesan:

- Login page (html form data is checked for validity in database)
- Assign session variables upon signing in
- Feature to create new user (HTML form data is parsed and database is used to check if a user with inputted credentials exists. If not, a new user (instructor/student) is created by writing to the database)
- JavaScript functions to ensure fields in HTML forms in login and create new user are filled prior to submitting data
- CSS for login and sign up
- Added UofT favicon

Total contribution:

- Johnson: 34%
- Yuxin: 33%
- Seyon: 33%
